Research Papers

Parallels in the origin of the geochemical signatures of island arc volcanics and continental potassic igneous rocks: The role of residual titanates
S.F. Foley (Mainz, Federal Republic of Germany) and G.E. Wheller (North Ryde, N.S.W., Australia) 1
Mantle metasomatism: Isotope and trace-element trends in xenoliths from Kimberley, South Africa
C.J. Hawkesworth (Milton Keynes, Great Britain), A.J. Erlank (Rondebosch, South Africa), P.D. Kempton (Milton Keynes, Great Britain) and F.G. Waters (Rondebosch, South Africa) 19
Pb isotopic compositions of Archean komatiites and sulfides
B. Dupré (Mainz, Federal Republic of Germany, and Paris, France) and N.T. Arndt (Paris, France) 35
An evaluation of the solubility of sulfide sulfur in silicate melts from experimental data and natural samples
S.R. Poulson and H. Ohmoto (University Park, Pa., U.S.A.) 57
Geochemistry and origin of cordierite–orthoamphibole/orthopyroxene–phlogopite rocks from Namaqualand, South Africa
J.M. Moore and D.J. Waters (Rondebosch, South Africa) 77
Two types of granitic intrusions in the Hida belt, Japan: Sr isotopic and chemical characteristics of the Mesozoic Funatsu granitic rocks
Y. Arakawa (Ibaraki, Japan) 101
The Nd- and Sr-isotopic composition of I-type microgranitoid enclaves and their host rocks from the Swifts Creek Pluton, southeast Australia
G.W. Eberz, I.A. Nicholls (Clayton, Vic., Australia), R. Maas, M.T. McCulloch (Canberra, A.C.T., Australia) and D.J. Whitford (North Ryde, N.S.W., Australia) 119
Rare-earth element geochemistry of alnoitic Cretaceous rocks and ultramafic xenoliths from Île Bizard (Québec, Canada)
L. Harnois, R. Mineau and M. Morency (Montréal, Qué., Canada) 135
Geochemistry of the granites and their minerals from Paredes da Beira–Penedono, northern Portugal
M.M.V.G. Silva and A.M.R. Neiva (Coimbra, Portugal) 147
The oxidation state of manganese in ferromanganese nodules and deep-sea sediments from the Central Indian Ocean
J.N. Pattan and A.V. Mudholkar (Dona Paula, India) 171

Discussion

On the origin of the Italian potassic magmas – Comments
A. Peccerillo (St. Agata-Messina, Italy) 183
On the origin of the Italian potassic magmas – Reply
R. Vollmer (Leeds, Great Britain) 191

Erratum 197

Research Papers

Sulfide globules in mid-ocean ridge basalts (MORB), and the effect of oxygen abundance in Fe–S–O liquids on the ability of those liquids to partition metals from MORB and komatiite magmas
R.D. Francis (Long Beach, Calif., U.S.A.) 199
Age and origin of a compositionally varied mafic dyke swarm in the Bunger Hills, East Antarctica
J.W. Sheraton, L.P. Black, M.T. McCulloch (Canberra, A.C.T., Australia) and R.L. Oliver (Adelaide, S.A., Australia) 215
Hydration of basic granulite to garnet–epidote amphibolite in the Sanbagawa metamorphic belt, central Shikoku, Japan
A. Goto and S. Banno (Kyoto, Japan) 247
Characteristics of REE and other trace elements in response to successive and superimposed metasomatism within a

0009-2541/90/$03.50 © 1990 Elsevier Science Publishers B.V.

portion of the South Mountain Batholith, Nova Scotia, Canada
M.C. Corey and A.K. Chatterjee (Halifax, N.S., Canada) 265
Matrix-independent separation of rare-earth elements and yttrium from geological materials using constant calcium content–oxalate precipitation and cation exchange for determination by high-resolution inductively coupled plasma atomic emission spectrometry (ICP–AES)
J.R. Webster and M.S. Gilstrap (Bloomington, Ind., U.S.A.) 287
Rhodium and osmium in iron meteorites
D.E. Ryan, J. Holzbecher (Halifax, N.S., Canada) and R.R. Brooks (Palmerston North, New Zealand) 295
Dissolution of native sulfur by the acid bomb digestion technique for the determination of trace elements and total sulfur
P.J. Lechler and M.O. Desilets (Reno, Nev., U.S.A.) 305
Removal of hydrogen sulfide from simulated Archean atmospheres by iron sulfide precipitation
H. Wiggering (Essen, Federal Republic of Germany) 311
The abundance and distribution of antimony in red-beds of the Devonian Catskill Formation, eastern Pennsylvania, U.S.A.
S. Pirc (Ljubljana, Yugoslavia) and A.W. Rose (University Park, Pa., U.S.A.) 321
Oxygen isotopes in iron (III) oxides, 1. Mineral–water fractionation factors
C.J. Yapp (Albuquerque, N.M., U.S.A.) 329
Oxygen isotopes in iron (III) oxides, 2. Possible constraints on the depositional environments of a Precambrian quartz–hematite banded iron formation
C.J. Yapp (Albuquerque, N.M., U.S.A.) 337
Element and isotope geochemical investigations of the Kupferschiefer in the vicinity of "Rote Fäule", indicating copper mineralization (Sangerhausen basin, G.D.R.)
J. Hammer (Greifswald, German Democratic Republic), F. Junge (Leipzig, German Democratic Republic), H.J. Rösler (Freiberg, German Democratic Republic), S. Niese, B. Gleisberg (Dresden, German Democratic Republic) and G. Stiehl (Leipzig, German Democratic Republic) 345
Trace-element distribution across calcite veins: A tool for genetic interpretation
Y. Erel and A. Katz (Jerusalem, Israel) 361
The chemical behavior of trace metals and ^{226}Ra during estuarine mixing in the Mullica River estuary, New Jersey, U.S.A.: A comparison between field observation and equilibrium calculation
L. Yan, R.F. Stallard, R.M. Key and D.A. Crerar (Princeton, N.J., U.S.A.) 369
Transport of industrial lead in snow through soil to stream water and groundwater
Y. Erel, Clair C. Patterson, M.J. Scott and J.J. Morgan (Pasadena, Calif., U.S.A.) 383
Multivariate analysis of lipid distributions in Recent salt marsh sediments
R. Abu El-Ella (Suez, Egypt) and J. Carpenter (Columbia, S.C., U.S.A.) 393
